## Construction

The fireplace glass pad is made of durable 4 mm thick tempered Float glass, resistant to high temperatures and mechanical damage. Its smooth surface facilitates cleaning, and polished edges ensure safe use. The transparent design aesthetically complements any interior while protecting the floor from sparks, embers, and dirt.

## Installation Instructions

1. Clean and dry the surface where the pad will be placed.
2. Ensure the floor is level so the glass adheres fully.
3. Carefully position the pad in the designated spot, avoiding impacts on the edges.
4. Check that the pad sits securely on the substrate and doesn't shift during use.

## Maintenance and Cleaning

Clean the pad with a soft, damp cloth or sponge using a mild detergent. Avoid abrasive cleaners, sharp tools, and harsh chemicals that could damage the glass surface. Regular cleaning will maintain its aesthetic appeal and effectively protect the floor from dirt.

### **IMPORTANT! Exercise caution when using this product.**

The product is made of glass—handle with care to prevent breakage or damage. Avoid using sharp or abrasive cleaning agents that could harm the pad's surface. If the glass becomes damaged (e.g., cracks, chips), discontinue use immediately and dispose of the product safely. Keep the pad away from children—risk of injury in case of breakage or if dropped. The fireplace pad is not intended to be placed directly under the fireplace as a base. It should be used solely for protective purposes, such as shielding the floor from hot sparks or ash, maintaining an appropriate distance from the heat source.
